

*Providing professional evaluation services for the educational,
non-profit and business communities since 1987.*

LAKEHOUSE

EVALUATION

Dennis W. Rudy & Ellen L. Rudy

WHAT WE DO

We gather evidence about your program or project to assess the extent to which you are reaching your goals and potential. We provide formative information and feedback to help during the project planning and implementation stages, and long-term, summative feedback about your project goals at the conclusion of your project or program of study.

HOW WE GATHER EVIDENCE

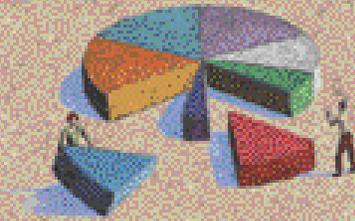

We use a mixed-methods approach to evaluation, utilizing both qualitative and quantitative measures as needed.

We pride ourselves on being able to use existing program measures as indicators of success for your program evaluation needs.

We specialize in designing quasi-experimental research plans for projects requiring treatment & comparison groups.

HOW YOU CAN USE US

We can complete your evaluation project from start to finish.

We are also comfortable working with various segments of your project.

We can consult on evaluation topics during the grant writing stage of your proposal, and provide on-going feedback and direction needed to ensure project completion and fulfillment of all program goals.

We will design an evaluation program that fits your needs. If you're applying for or if you are the recipient of a state, federal or foundation grant, we can assist you with the evaluation portion of your work.

SERVICES

**Design an evaluation plan for your internal use,
Provide format and structure for your evaluation needs,
